Black Box Testing: Quizicals

Will Enright, Zhaoji Jiang, Adam Petty, Dingfu Sun, Thomas Worns

April 22, 2016

Defect ID	Description	Severity
Compatibility, 50	Program only runs on Windows, but the environment section of the backlog makes clear it should be cross-platform (Windows, Mac OS, Linux).	2
Edit Quiz, 29	The question selected for deletion is *not* deleted from the quiz when "Remove" is clicked.	2
Login, 3	There is no mismatched password notification displayed to the user, and an unknown password from either the "new" or "confirm" entry is accepted. Afterwards, the user is able to login with any password regardless.	1
Login, 4	There is no invalid password notification displayed to the user, nor are they shown any valid password criteria. The user is now able to login with any password.	1
Login, 5	There is no incorrect username/password notification displayed to the user, and the user is now able to login with any password.	1
Gradebook, 39	The student is unable to see the updated score entered by the teacher when they click to view that quiz. Instead, they only see the original quiz score.	2
Login, 53	If no username has been input when the "Forgot my password" button is clicked, no error is displayed and the subsequent security question prompt can be answered with any input, and the password can be changed. None of the changes made this way are saved to any user.	3
