Login, 5	Incorrect username/password notification is *not* displayed to the user, and the user is now able to login with any password.	1

Note: The following test cases were not included in the original Test Plan document.

Compatibility		
ID	**Description**	**Severity**
Compatibility, 50	Program only runs on Windows, but the backlog makes clear it should be cross-platform (Windows, Mac OS, Linux).	2

Reliability		
ID	**Description**	**Severity**
Reliability, 51	Very high failure rate. When the many of the program's features are used and lead to a defect, entire scope of the program encounters defects and ultimately leads to system failure. For example, encountering a defect while changing passwords prevents quizzes from loading or the ability to bypass login altogether.	1

Recovery		
ID	**Description**	**Severity**
Recovery, 52	When one window of the program is closed, the entire program is closed and no changes that are being made are saved.	2
